

Parental Knowledge and Attitudes: Its Influence on Childhood Vaccination Rates

Dear **Respondent,**

We are conducting a research study to assess parental knowledge and attitudes regarding childhood vaccinations and how these factors influence vaccination rates. The insights gathered will help improve awareness, address concerns, and enhance childhood immunization programs.

Your participation in this survey is entirely voluntary, and all responses will be kept confidential. There are no right or wrong answers. We encourage you to answer each question honestly based on your knowledge and beliefs. Your input is valuable in understanding and improving vaccination awareness and implementation.

Thank you for your time and participation.

QUESTIONNAIRE:

Instructions:

This questionnaire is divided into several sections that assess your knowledge and attitudes about childhood vaccination. Please read each statement carefully and select the response that best reflects your knowledge, beliefs, and opinions.

Full Name (*Optional*): _____ **Age:** _____

Gender: ☐ Male | ☐ Female **Number of Children(s):** _____

Age of Children(s): 1st:____ 2nd:____ 3rd:____ 4th:____ 5th:____ others:_____.

Have your children received vaccinations? ☐ Yes | ☐ No

If **No**, what are the reasons? _____.

INDICATIONS	Very High 4	Moderately 3	Low 2	Very Low 1
A. LEVEL OF KNOWLEDGE ON IMMUNIZATION PROVIDED TO CHILDREN BY THE EPI (Expanded Programme on Immunization)				
DPT (Diphtheria-Pertussis-Tetanus) Vaccine				
Hepa B (Hepatitis B) Vaccine				
Polio Vaccine				
MMR (Measles, Mumps, Rubella) Vaccine				
Flu Vaccine				
B. IMMUNIZATION BY AGE: FROM BIRTH TO 6 YEARS OLD				
DPT (Diphtheria-Pertussis-Tetanus) Vaccine				
Hepa B (Hepatitis B) Vaccine				
Polio Vaccine				
MMR (Measles, Mumps, Rubella) Vaccine				
Flu Vaccine				

C. LEVEL OF KNOWLEDGE ON THE IMPORTANCE OF IMMUNIZATION

Protection from Swine Diseases				
Reduce the Risk of Complications				
Community Protection				
Global Health				
Protection from Infections				

INDICATIONS	Strongly Agree 4	Disagree 3	Neutral 2	Strong Disagree 1
D. PARENTAL ATTITUDE TOWARDS CHILDHOOD VACCINATION				
1. I believe that childhood vaccinations are essential for my child's health.				
2. I actively seek information about the benefits and risks of vaccines.				
3. I feel comfortable discussing vaccinations with healthcare providers.				
4. I am confident that vaccines are safe and effective.				
5. I believe that well-informed parents are more likely to vaccinate their children.
